

Under the Direction of:

M. Andre-Claude Lacoste

President of the Nuclear Safety Authority

Programme Committee

Chair: Jean-Luc GODET

Director of Ionising Radiation and Health
ASN

Scientific Secretary

Isabelle Mehl-Auget, Chantal Bardelay, Nathalie Clipet,
ASN

Members :

Didier Champion	Radiation Protection and Nuclear Safety Institute – IRSN
Michel Demet	National Association of Local Information Committees and Commissions – ANCCLI
Catherine Guéron	Direction of Civilian Safety - DSC
Ted Lazo	Nuclear Energy Agency - NEA
Jacques Lochard	Nuclear Protection Evaluation Centre CEPN
Anita Villers	Environmental Development Alternative - EDA
Olvido Guzman Bruno Verhaeghe	Nuclear Safety Authority - ASN

Objectives of the Seminar

Transmit and share post-accident culture with experts and local stakeholders

- Present the Guide for leaving the urgent phase, illustrate the roles of all mobilized participants and draw lessons concerning the local adaptation of the Guide by regional and local community governmental organisations
- Engage in a discussion of risk management policy for post-accident situations
- Constructively challenge the work of CODIRPA with analysis by international experts

Public

The seminar is addressed to:

- Local stakeholders (e.g. regional and departmental governments, local community officials, Local Information Committees, etc.)
- Experts engaged in the work of CODIRPA (e.g. elected officials, industry, associations, state services, etc.)
- Foreign experts involved in similar work and foreign radiological protection authorities.

Language

The principle language of the seminar will be French, with some presentations by foreign experts in English. However, simultaneous French-English and English-French translation will be available.

Registration

Participation is by invitation, and without fee

Registration Deadline: 14 January 2011

The number of invitees for this conference is limited, and as such we invite you to confirm your participation as soon as possible at the following web-site:

seminairepostaccident@asn.fr

FIRST ANNOUNCEMENT

2011 POST NUCLEAR- ACCIDENT SEMINAR

THE WORK OF CODIRPA

5 - 6 MAY 2011

Salle Victor HUGO
101, rue de l'Université

PARIS
FRANCE

Organised by the
French Nuclear Safety Authority

With the support

of the Parliamentary Office for Scientific and
Technological Assessment

Context

Nuclear activities are undertaken in a fashion designed to avoid accidents, and to limit their possible consequences. Conforming with the principle of defence in depth, many mechanisms and approaches are put in place to address radiological accident situations, even those of low probability. Historically, focus is aimed towards the management of the accident situation itself, however it now seems necessary to focus more on the management of the post-accident phase of an accident.

The CODIRPA programme was started in June 2005 by the ASN, and was charged with developing French policy for the management of the post-accident phase of a nuclear or radiological accident situation. An ambitious programme mobilising more than 200 people was put in place, including representatives of relevant national administrations and their local representatives, utility and industrial representatives, technical service organisations, nuclear safety authorities from bordering countries to France, NGOs and local elected officials.

To compliment activities addressing policy at the national level, several dialogue processes were engaged with organisations and officials from local governmental administrations, with relevant services from the agricultural ministry, and with civil society representatives in order to test ideas and approaches against local realities. In this context, the first operational CODIRPA product, the guide for leaving the urgent phase, is currently being adapted for local application.

Programme

THURSDAY, 5 MAY 2011

- 8:00 Registration of participants
- 9:15 **Opening of the seminar**
- 9:30 **Session 1 : Guide for Leaving the Urgent Phase**
- *The Urgent Phase*
 - *Post-accident Zoning*
 - *Interdictions for eating and selling food*
 - *Implementation of Emergency Evacuation and Information Centres*
 - *Ending Sheltering*
 - *Decontamination and Management of Waste*
- 13 :00 Lunch
- 14:00 **Session 2 : Development of the Guide for Leaving the Urgent Phase**
- *The CODIRPA Process*
 - *The Adaptation of the Guide by Prefectures and Local Communities*
 - *Perspectives : Integration of Guide Recommendations in Local Crisis Management Approaches*
- 16:00 **Round Table Discussion :**
- Key Issues in Local Adaptation of the Guide**
- 17:00 End of the First Day

Programme

FRIDAY, 6 MAY 2011

- 9:00 **Session 3 : The Transition Phase**
- Key elements***
- *The evolution of Zones and the Implementation of Radiological Measurements*
 - *Management of Restrictions*
 - *Management of Specific Wastes*
 - *Compensation*
 - *Health Surveillance*
 - *Information and Communication*
- 11:45 **Session 4 : The Long-term Phase**
- What is at Stake?***
- *Self-help Approaches 25 Years After Chernobyl: the Belarusian Experience*
 - *Vulnerability Study in a Contaminated Area of Norway*
- 12:30 Lunch
- 14:00 **Session 4 : The Long-term Phase (continued)**
- Main Lines: Live, work, produce, develop***
- *Radiological Protection Culture*
 - *Involvement of Local Stakeholders in Radiological Measurements and Health Surveillance*
- 15:15 **Session 5 : Viewpoints on French Preparation for the Post-Accidental Situation**
- *The work of the ANCCLI*
 - *Work of EDA: Involvement of citizens and local stakeholders in the governance of major risks*
 - *External Audit of the CODIRPA process*
- 16:00 **Round Table Discussion :**
- Critical Analysis of the CODIRPA Work by the International Community**
- 17:00 **Closing of the Seminar**
